Author index

Afrane, G. 293

Bartsch, R.A. 243
Berghmans, H. 171
Berghmans, S. 171
Bowen, W.R. 149
Burggraaf, A.J. 161

Castilla, J. 107
Changrong, X. 9
Chimowitz, E.H. 293
Chou, M.-T. 279
Correia, V.M. 117, 129

Davis, R.H. 47
Decloux, M. 93
Dimov, A. 273
Dingkun, P. 9
Dixon, A.G. 253

Elferink, W.J. 161

Fane, A.G. 149, 229
Fanqing, L. 9
Feng, W. 9
Feng, X. 67

García-Hernández, M.T. 107
Gilde, M.J. 161
Godjevargova, Ts. 273
Guangyao, M. 9

Hachisuka, H. 265
Hara, M. 191
Hasson, D. 77
Hayas, A. 107
Hayashita, T. 243
Higuchi, A. 191
Horno, J. 107
Huang, M.-R. 143
Huang, P. 301
Huang, R.Y.M. 67

Ikeda, K. 265
Ishikawa, G. 191

Jermoumi, T. 211
Judd, S.J. 117, 129

Kato, K. 191
Keizer, K. 161
Kim, K.J. 149
Kourie, J.I. 221
Krishnamoorthy, T.S. 31
Kusakabe, K. 39

Lee, J.C. 243
Levenstein, R. 77
Li, X.-G. 143
Lin, G. 143
Lin, Y.S. 301
Lu, Y. 253

Ma, Y.H. 253
Maiti, B. 31
Manabe, S.-i. 191
Marignan, J. 211
Meijer, H.E.H. 171
Mizutani, Y. 1

Journal of Membrane Science 116 (1996) 313–314

journal of MEMBRANE SCIENCE

Subject index

Active pore size, 301
Alkali metal cation transport, 243
Alumina membrane, 9
Anion permeation, 31
Asymmetric membrane, 265

Bilayer vagaries, 221
Biotechnology, 47
Boehmite sol, 9

Calf thymus DNA, 191
Carrier impregnated membrane, 61
Ceramic membrane, 301
Charge density, 273
Chemical modification, 243
Chitosan membrane, 67
Chloride channel, 221
Composite membrane, 67, 211, 293
Concentration polarisation, 117, 129, 229
Constant permeate flux control, 93
Crossflow microfiltration, 93

Depolarisation, 229
Diffusion, 293
Dissolution property, 265
Donnan effect, 77
Double layers, 1
Drawing, 279
Dynamically-formed membranes, 117, 129
Dynamic membrane, 17

Electrical charge, 149
Electroosmosis, 149
Ethylene glycol/water separation, 67

6FDA-BAAF polyimide, 265
Fibre spinning, 171
Fouling, 47
Fuzzy controller, 93

Gas and vapor permeation, 199, 265
Gas permeation, 211
Gas separation, 39, 161, 171, 199, 265
Gelatin, 17
Glass membranes, 253
Glucose oxidase, 273

Hollow fiber, 191, 279
Hydraulic permeability, 279
Hydrous zirconium oxide, 117, 129
Hyper-thin skin layer, 265

Immobilization, 273
Inorganic membrane, 9, 39, 301, 253
Ionic transport in membranes, 107
Ionisation, 129

Liquid crystal, 143

Mass transfer, 117
Mechanical properties, 279
Membrane modification, 273
Membrane potential, 273
Membrane preparation and structure, 211, 265
Membrane reactors, 253
Metal speciation, 31
Microfiltration, 47
Microfiltration membranes, 191
Microporous, 161
Microporous and porous membranes, 199, 253
Microporous hollow fiber, 1
Microporous structure, 1
Mixed convection, 229
Mixed-gas transport, 199
Molecular weight retention curve, 17

Nafion membrane, 31, 243
Nanofiltration, 77
Natural convection instability, 229
Nernst–Planck–Poisson equations, 107
Network method, 107

N-Octadecanoyl-*N*-phenylhydroxylamine, 61
Organic–inorganic materials, 211
Oxygen-enriching membrane, 143

Permeance, 39
Permeation, 191
Permeation of uranium and copper, 31
Permeation rate, 265
Permporometry, 301
Pervaporation, 67

Poly(acrylic acid), 117, 129
Polyacrylonitrile, 279
Polyelectrolytes, 77
Poly(methylsilsesquioxane) filler, 1
Poly(1-trimethylsilyl-1-propyne), 199
Pore size distribution, 301
Porous membrane, 149
PPE, 171
PSPICE modeling, 107

Raw cane sugar, 93
Regenerated cellulose, 191
Retention, 279

Salt rejection, 77
Sarcoplasmic reticulum, 221
Selective interaction of Ga^{3+}, 61
Selective separation of Ga^{3+}, 61
Selectivity, 265
Separation, 293
Silica membrane, 161
Skeletal muscle, 221
Sol–gel, 211
Sol–gel process, 9, 161
Sol property, 9
Specific bilayer capacitance, 221
Stability, 143
Streaming potential, 149
Supercritical fluids, 293
Surface modified membranes, 47
Surface selectivity, 161

Temperature dependence, 143
Thickness ratio, 1
TIPS, 171
Transport models, 77
Triheptyl cellulose, 143

Ultrafiltration, 17, 229, 301

Water permeability, 1

Zeta potential, 149
ZSM-5 zeolite, 39
